

Winter Coats & Car Seats

How to stay warm AND safe

Bulky winter coats and snow pants should not be worn in a car seat as it makes the harness straps too loose to be effective in a crash.

No coat or a light weight fleece. Wear a warmer coat while going to and from the car.

The fluff of a bulky winter coat can compress in a car crash making harness straps loose, which can cause injury or ejection.

No coat. Use a blanket for warmth.

Harness child, then put coat on backwards.

Unzip coat, then buckle child.

Remember to
"Strap Before
You Wrap"

Warm your
car ahead
of time when
possible.
