

Trunk Entrapment Safety Tips

Everything you need to know to keep your kids safe from trunk entrapment.

Learn how to keep the car trunk off limits and teach children to be cautious in and around cars with some basic tips.

- Make sure to lock your vehicle, including doors and trunk, when you're not using it. Keep keys and remote entry fobs out of children's sight and reach.
- Teach kids that trunks are for transporting cargo and are not safe places to play.

- Show older kids how to locate and use the glow-in-the-dark emergency trunk release found in cars made after Sept. 1, 2001. Very young children may not have the strength or ability to open the release bar.

- Keep rear fold-down seats closed to help prevent kids from climbing into the trunk from inside your car.
- If your child is missing, get help and check swimming pools, vehicles and trunks. If your child is locked in a car, get him or her out as quickly as possible and dial 911 immediately. Emergency personnel are trained to evaluate and check for signs of heatstroke.

A combination of poor ventilation and high temperatures make trunk space a dangerous place for children. In one four-year span, trunk entrapment resulted in the death of 16 children in the United States.
